GROSS HORSEPOWER
551 kW 739 HP

NET HORSEPOWER
533 kW 715 HP

MAXIMUM GVW
99680 kg 219,760 lb

Machine shown may include optional equipment.

HD465-7R

STANDARD EQUIPMENT FOR BASE MACHINE

ENGINE:
- Automatic Idling Setting System (AISB)
- Alternator, 90A/24V
- Batteries, 2 x 12V/300AH
- Engine, Komatsu SAA6D170E-5
- Mode selection system
- Starting motor, 2 x 7.5 kW

CAB:
- Ashtray
- Cigarette lighter
- Cup holder
- Electronic dump control system
- Electronic maintenance display/monitoring system
- Operator seat, reclining, suspension type with retractable 78 mm 3" width seat belt
- Passenger seat with retractable seat belt
- Power window (LH)
- ROPS cab with ROPS, sound suppression type
- Space for lunch box
- Steering wheel, tilt and telescopic
- Sunvisor
- Laminated glass, front
- Two doors, left and right

LIGHTING SYSTEM:
- Windshield washer and wiper
  (with intermittent feature)

SAFETY EQUIPMENT:
- Alarm, backup
- Automatic Retard Speed Control (ARSC)
- Coolant temperature alarm and light
- Front brake cut-off system
- Horn, electric
- Ladders, left and right hand sides
- Overrun warning system
- Rearview mirrors and under view mirrors
- Supplementary steering

OTHER:
- Centralized greasing
- Electric circuit breaker, 24V
- Mud guards

BODY:
- Body exhaust heating
- Cab guard, left side
- Split guard, 150mm 6"

TIRES:
- 24.00-35-36PR

OPTIONAL EQUIPMENT

CAB:
- Air conditioner
- Heater and defroster
- Operator seat, air suspension type
- Radio, AM/FM with cassette
- Sunvisor, additional
- Power window (R/H)

BODY:
- Body liners
- Platform guard, right hand side
- Rock body
- Upper side extension, 200 mm 8"
- Without body heating (with muffler)

LIGHTING SYSTEM:
- Back work lights, left and right sides
- Fog lights
- Yellow beacon
- Back-up light
- Hazard lights
- Headlights with dimmer switch
- Indicator, stop and tail lights

GUARD AND COVERS:
- Exhaust thermal guard
- Fire protective covers
- Drive shaft guard (front and rear)

SAFETY EQUIPMENT:
- Alert, backup
- Automatic Spin Regulator (ASR)
- Automatic supplementary steering
- Rear view camera and monitor

ARRANGEMENT:
- Batteries for cold area arrangement
- Cold area arrangement
- Sandy and dusty area arrangement

OTHER:
- Auto-greasing system
- Engine coolant heater
- Engine oil pan heater
- Engine side cover
- Engine underguard
- Fire extinguisher
- Fuel quick charge
- Payload meter
- Muffler (no body heating type)

SAFETY EQUIPMENT:
- Alarm, backup
- Automatic Retard Speed Control (ARSC)
- Coolant temperature alarm and light
- Front brake cut-off system
- Horn, electric
- Ladders, left and right hand sides
- Overrun warning system
- Rearview mirrors and under view mirrors
- Supplementary steering

OTHER:
- Centralized greasing
- Electric circuit breaker, 24V
- Mud guards

BODY:
- Body exhaust heating
- Cab guard, left side
- Split guard, 150mm 6"

TIRES:
- 24.00-35-36PR

www.Komatsu.com Printed in Japan 200905 IP.P. AD (05)
Productivity Features

- High performance Komatsu SAA6D170E-5 engine
  Net horsepower 533 kW 715 HP
- Mode selection system
  (Variable horsepower control in Economy mode)
- Automatic Idling Setting System (AISS)
- Automatic Retard Speed Control (ARSC)
- 7-speed, fully automatic K-ATOMiCS transmission
- Fully hydraulic controlled wet multiple-disc brakes and retarder
  Retarder absorbing capacity (Continuous descent) 785 kW 1,052 HP
- Long wheelbase and wide tread
- Large high strength body
  Heaped capacity 34.2 m$^3$ 44.7 yd$^3$
  Small turning radius 8.5 m 27' 11"
- Payload Meter (PLM) (Option)

Operator Environment

- Wide, spacious cab with excellent visibility
- Ergonomically designed cab
- Easy-to-see instrument panel
- Ideal driving position settings
- K-ATOMiCS with “Skip-shift” function
- Hydro pneumatic suspension
- Built-in ROPS/FOPS cab
- Viscous cab mounts
- Electric body dump control
- Supplementary steering and secondary brake
- Three-mode hydro pneumatic suspension (Automatic suspension) (Option)

Harmony with Environment

- Low operation noise
- Lead-free radiator
- Brake cooling oil recovery tank

Reliability Features

- Komatsu components
- High-rigidity frame
- Rigorous dump body design
- Reliable hydraulic system
- Flat face-to-face O-ring seals
- Sealed DT connectors
- Anti-lock Brake System (ABS) (Option)
- Automatic Spin Regulator (ASR) (Option)
- Pedal-operated secondary brake

Easy Maintenance

- Advanced monitoring system
- Wet multiple-disc brakes and fully hydraulic controlled braking system
- Extended oil change interval
- Centralized arrangement of filters
- Disc wheels (Flange type rims)
- Electric circuit breaker
- Centralized greasing points
- Vehicle Health Monitoring System (VHMS) (Option)

Machine shown may include optional equipment.
**PRODUCTIVITY FEATURES**

**Automatic Idling Setting System (AISS)**
This system facilitates quick engine warm-up and cab cooling/warming. When setting the system ON, engine idle speed is kept at 945 rpm when coolant temperature is 50°C or lower. Speed automatically returns to 750 rpm when coolant temperature reaches 50°C 122°F.

**7-speed, fully automatic K-ATOMiCS transmission**
The K-ATOMiCS (Komatsu Advanced Transmission with Optimum Modulation Control System) automatically selects the optimum gear according to vehicle speed, engine speed and the shift position you’ve chosen. The result: the best gear for any driving situation.

**Automatic Retard Speed Control (ARSC)**
ARSC allows the operator to simply set the downhill travel speed and go down slopes at a constant speed. As a result, the operator can concentrate on steering. The speed can be set at increments of 1 km/h 0.6 MPH per click (±5 km/h 3.1 MPH of setting speed adjustment) to match the optimum speed for the slope. Also, since the retarder cooling oil temperature is always monitored, the speed is automatically lowered.

**Payload Meter (PLM)**
(Option)
PLM allows the production volume and the working conditions on the dump truck to be analyzed and controlled directly via a personal computer. And also the loadage is indicated with the outside lamp. The system can store up to 2900 working cycles.

**High performance Komatsu SAA6D170E-5 engine**
Powerful turbocharged and air-to-air aftercooled Komatsu SAA6D170E-5 engine provides 533 kW 715 HP (Net). This engine realizes high power in low fuel consumption with Common Rail Injection system (CRI), and thus it delivers higher travel speeds with high horsepower. Also high torque at low speed, impressive acceleration, and low fuel consumption ensure maximum productivity.

**Mode selection system**
The system allows selection of the appropriate mode between two modes <Power mode > or <Economy mode> according to each working condition. The mode is easily selected with a switch in the operator’s cab.

- **Power mode**
  Great productivity can be attained by taking full advantage of high output power. It is appropriate for job sites where larger production uphill-hauling is required.

- **Economy mode (Variable horsepower control)**
  The engine power automatically changes depending on loaded or unloaded conditions always to use an optimum speed gear. It is appropriate for light work on flat ground.

**Long wheelbase and wide tread**
With an extra-long wheelbase, a wide track and an exceptionally low center of gravity, the HD465-7R hauls the load at higher speed for greater productivity, and delivers superior driving comfort over rough terrain.

**Fully hydraulic controlled wet multiple-disc brakes and retarder**
Wet multiple-disc brakes ensures highly reliable and stable brake performance. The large-capacity, continuously cooled, wet multiple-disc brakes also function as a highly responsive retarder which gives the operator greater confidence at higher speeds when travelling downhill.
- Retarder Absorbing Capacity (continuous descent): 785 kW 1,052 HP
- Brake Surface Area (rear): 64,230 cm² 9,956 in²

**Large body**
A wide target area makes for easy loading with minimal soil spillage and more efficient hauling. The V-shape design also increases structural strength, and provides excellent load stability.

**Small turning radius**
The MacPherson strut type front suspension has a special A-frame between each wheel and the main frame. The wider space created between the front wheels and the main frame increases the turning angle of the wheels. The larger this turning angle, the smaller the turning radius of the truck.

**Payload Meter (PLM) (Option)**
PLM allows the production volume and the working conditions on the dump truck to be analyzed and controlled directly via a personal computer. And also the loadage is indicated with the outside lamp. The system can store up to 2900 working cycles.

**Small turning radius**
The MacPherson strut type front suspension has a special A-frame between each wheel and the main frame. The wider space created between the front wheels and the main frame increases the turning angle of the wheels. The larger this turning angle, the smaller the turning radius of the truck.

**Payload Meter (PLM) (Option)**
PLM allows the production volume and the working conditions on the dump truck to be analyzed and controlled directly via a personal computer. And also the loadage is indicated with the outside lamp. The system can store up to 2900 working cycles.
Wide, spacious cab with excellent visibility
Wide windows in the front, side and back, plus plenty of space in the richly upholstered interior, provide quiet, comfortable environment from which to see and control every aspect of operation. Front under view mirrors and side under view mirrors have been added to improve safety.

Ergonomically designed cab
The ergonomically designed operator’s compartment makes it very easy and comfortable for the operator to use all the controls. The result is more confident operation and greater productivity.

Easy-to-See instrument panel
The instrument panel makes it easy to monitor critical machine functions. In addition, a caution light warns the operator of any problems that may occur. Problems are recorded in the monitor and indicated as service codes. This makes the machine user friendly and easy to service.

Ideal driving position settings
The 5-way adjustable operator seat and the tilt-telescopic steering column provide an optimum driving posture, for increased driving comfort and more control over machine operation. The suspension seat dampens vibrations transmitted from the machine and reduces operator fatigue as well as holding the operator securely to assure confident operation. 78mm 3” width seat belt is provided as standard equipment.

K-ATOMICS with “Skip-shift” function
An electronically controlled valve is provided for each clutch pack in the transmission for independent clutch engagement/disengagement. It enables an ideal change in clutch modulation pressure and torque cut-off timing in response to travel conditions. This system and newly added “skip-shift” function ensure smooth shifting and responsive acceleration.

“Skip-shift” function
Optimum travel speed automatically selected in response to angle of ascent. Reduced frequency of downshift and smoother operation are provided.

Viscous cab mounts
Viscous mounts reduce the noise transmitted to the cab and achieve a quiet 77 dB(A) noise level.

Electric body dump control
The low effort lever makes dumping easy. A positioning sensor is installed for dump body control which significantly reduces the shock made by the lowering of the dump body.

Built-in ROPS/FOPS cab
These structures conform to ISO3471 ROPS standard, and ISO 3449 FOPS standard.

Supplementary steering and secondary brake
Supplementary steering and secondary brakes are standard features.
Steering: ISO 5010, SAE J1511
Brakes: ISO 3450
## RELIABILITY FEATURES

### Komatsu components
Komatsu manufactures the engine, torque converter, transmission, hydraulic units, and electrical parts on this dump truck. Komatsu dump trucks are manufactured with an integrated production system under strict quality control system guidelines.

### High-rigidity frame
Cast-steel components are used in the main frame for high-stress areas where loads and shocks are most concentrated.

### Rigorous dump body design
The body is built of 130 kg/mm², 184,900 PSI wear-resistant high-tensile steel with a Brinell hardness of 400. The V-shape and V-bottom design also increase structural strength. The side and bottom plates of the dump section are reinforced with ribs for added strength.

### Reliable hydraulic system
The oil cooler is installed underneath of the radiator, improving the reliability of the hydraulic system during sudden temperature rises. Further, in addition to the main filter, a 25-micron line filter is at the entrance to the transmission control valve. This system helps to prevent secondary faults.

### Flat face-to-face O-ring seals
Flat face-to-face O-ring seals are used to securely seal all hydraulic hose connections to prevent oil leakage.

### Protection functions supported by electronic control

<table>
<thead>
<tr>
<th>Item</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>Downshift inhibitor</td>
<td>Even if the driver downshifts accidentally, a Drop-down switch prevents incorrect gear shifting.</td>
</tr>
<tr>
<td>Overrun inhibitor</td>
<td>When disengaging the drive, the brakes automatically engage to prevent overrun.</td>
</tr>
<tr>
<td>Reverse inhibitor</td>
<td>The vehicle is prevented from moving backward when operating the reverse.</td>
</tr>
<tr>
<td>Forward/Reverse shift inhibitor</td>
<td>This design ensures it is impossible to shift from forward to reverse when the vehicle’s speed surpasses 4 km/h.</td>
</tr>
<tr>
<td>Anti-hunting system</td>
<td>When running near a stop, smooth automatic shifting takes place.</td>
</tr>
<tr>
<td>Neutral safety</td>
<td>The engine is prevented from starting when the shift lever is not in neutral.</td>
</tr>
</tbody>
</table>

### Sealed DT connectors
Main harnesses and controller connectors are equipped with sealed DT connectors providing high reliability, water resistance and dust resistance.

### Antilock Brake System (ABS) (Option)
Using its outstanding electronics technology, Komatsu is the first in the industry to introduce ABS on construction machinery. This system prevents the tires from locking, thus minimizing skidding under slippery conditions while applying the service brake.

### Automatic Spin Regulator (ASR) (Option)
ASR automatically prevents the rear tires on either side from slipping on soft ground for optimal traction.

### Pedal-operated secondary brake
If there should be a failure in the foot brake, the parking brake and front disc brakes are activated as a pedal operated secondary brake. In addition, when hydraulic pressure drops below the rated level, the parking brake is automatically activated.

### Lead-free radiator
In addition to compliance with emission regulations, a lead-free aluminum core is used for the radiator to meet global environmental requirements.

### Brake cooling oil recovery tank
To protect the environment, a tank is installed to recover brake cooling oil in the event of brake floating seal leakage.

### Centralized greasing points
Greasing points are centralized at three locations, it enables to approach from ground level.

### EASY MAINTENANCE

### Advanced monitoring system
The Komatsu advanced monitoring system identifies maintenance items, reduces diagnostic times, indicates oil and filter replacement hours and displays abnormality codes. This monitor system helps to maximize machine production time.

### Wet multiple-disc brakes and fully hydraulic controlled braking systems
Realize lower maintenance costs and higher reliability. Wet disc brakes are fully sealed to keep contaminants out, reducing wear and maintenance. Brakes require no adjustments for wear, meaning even lower maintenance. The parking brake is also an adjustment-free, wet multiple-disc system for high reliability and long life. Added reliability is designed into the braking system by the use of three independent hydraulic circuits providing hydraulic backup should one of the circuits fail. Fully hydraulic braking systems eliminate the air system so air bleeding is not required, and water condensation that can lead to contamination, corrosion and freezing is eliminated.

### Extended oil change intervals
In order to minimize operating costs, oil change intervals have been extended:
- Engine oil: 500 hours
- Hydraulic oil: 4000 hours

### Centralized arrangement of filters
The filters are centralized so that they can be serviced easily.

### Disc wheels (Flange type rims)
Disc wheels (Flange type rims) provide easy removal/installation for the tires.

### Electric circuit breaker
A circuit breaker is adopted in important electric circuits that should be restored in a short time when a problem occurs in the electrical system.

### Vehicle Health Monitoring System (VHMS) (Option)
VHMS controller monitors the health conditions of major components, enables remote analysis of the machine and its operation. This process is supported by the Komatsu distributors, factory and design team. This contributes to reduced repair costs and to maintaining maximum availability.

### Greasing points
Greasing points are centralized at three locations, it enables to approach from ground level.
### SPECIFICATIONS

#### ENGINE

- **Type**: Komatsu SAA6D175E-5, Water-cooled, 4-cylinder Turbocharged, air-to-air after-cooled
- **Aspiration**: Turbocharged, air-to-air after-cooled
- **Number of cylinders**: 6
- **Bore x stroke**: 170 mm x 170 mm 6.69" x 6.69"
- **Piston displacement**: 23.15 ltr 1,413 in³
- **Horsepower**: SAE J1995 Gross 551 kW 739 HP ISO 5049 / SAE J1346 Net 533 kW 715 HP
- **Rated rpm**: 2000 rpm
- **Fan drive type**: Mechanical
- **Governor**: Electronically controlled
- **Fuel system**: Direct injection
- **Effective cylinder stroke (front suspension)**: to dampen vibration.

#### TRANSMISSION

- **Torque converter**: 3 elements, 1-stage, 2-phase direct drive in 1st lockup and all higher gears
- **Transmission**: Full-automatic, planetary type
- **Speed range**: 10 speeds forward and 1 reverse
- **Lockup clutch**: Wet, multiple-disc clutch
- **Forward**: Torque converter drive in 1st gear, direct drive in 1st lockup and all higher gears
- **Reverse**: Torque converter drive
- **Shift control**: Electronic shift control with automatic clutch modulation in all gear
- **Maximum travel speed**: 70.0 km/h 43.5 mph

#### AXLES

- **Rear Axle**: Full-floating
- **Final drive type**: Planetary gear
- **Differential**: 3.538
- **Planetary**: 4.737

#### SUSPENSION SYSTEM

- **Dimension**: Independent, hydro pneumatic suspension cylinder with fixed throttle to dampen vibration.
- **Effective cylinder stroke (front suspension)**: 303 mm 11.9"
- **Rear axle oscillation**: 6.8°
- **Mechanical stopper**: 7.7°

#### STEERING SYSTEM

- **Type**: Fully hydraulic power steering
- **Supplementary steering**: Manual control (meets ISO 5010 and SAE J1511)
- **Minimum turning radius**: 8.5 m 27.9"
- **Maximum steering angle**: 39°

#### CAB

- **Dimensions**: Comply with ISO 3471 ROPS (Roll-Over Protective Structure) standard, and ISO3449 FOPS standard
- **Type**: Box-sectioned structure

#### BRAKES

- **Brakes**: Meet ISO 3450 standard.
- **Service brakes**:
  - **Front**: Fully hydraulic control, caliper disc type
  - **Rear**: Fully hydraulic control, oil-cooled multiple-disc type
- **Parking brake**: Spring applied, multiple-disc type
- **Retarder**: Oil-cooled, multiple-disc rear brakes act as retarder.
  - **Manual pedal operation.**
  - **When hydraulic pressure drops below the rated level, parking brake is automatically actuated.**
- **Brake surface**:
  - **Front**: 1936 mm² 380 in²
  - **Rear**: 64230 mm² 9566 in²

#### BODY

- **Capacity**:
  - **Fuel tank**: 206.1 U.S. Gal 780 ltr
  - **Engine oil**: 21.1 U.S. Gal 80 ltr
  - **Torque converter, transmission and retarder cooling**: 6.8 U.S. Gal 251 ltr
  - **Differential**: 26.1 U.S. Gal 99 ltr
  - **Final drives (total)**: 11.1 U.S. Gal 42 ltr
  - **Hydraulic system**: 32.2 U.S. Gal 122 ltr
  - **Suspension (total)**: 14.7 U.S. Gal 55.6 ltr
- **Material**: High-tensile-strength steel
- **Material thickness**:
  - **Structure**: 19 mm 0.75"
  - **Front**: 12 mm 0.47"
  - **Sides**: 9 mm 0.35"
  - **Target area (inside length x width)**: 6450 mm x 3870 mm 212" x 152"
  - **Dumping angle**: 48°
  - **Height at full dump**: 8800 mm 2810"
  - **Heating**: Exhaust heating

#### HYDRAULIC SYSTEM

- **Cylinder**: 122 ltr 215 ltr
- **Piston displacement**: 95 ltr 1640 cc
- **Structure**: V-shape body with V-bottom

#### TRAVEL PERFORMANCE

To determine travel performance: Read from gross weight down to the percent of total resistance. From this weight-resistance point, read horizontally to the curve with the highest obtainable speed range, then down to maximum speed. Usable impul speed depends upon traction available and weight on drive wheels.

#### BRAKE PERFORMANCE

To determine brake performance: These curves are provided to establish the maximum speed and gearshift position for safer descents on roads with a given distance. Read from gross weight down to the percent of total resistance. From this weight-resistance point, read horizontally to the curve with the highest obtainable speed range, then down to maximum descent speed the brakes can safely handle without exceeding cooling capacity.
