4 Wheel Steering Backhoe Loader

**WB97S-5**

**ENGINE POWER**
74 kW / 99,2 HP @ 2,200 rpm

**OPERATING WEIGHT**
8,700 kg
Walk-Around

The WB97S-5 belongs to the latest generation of Komatsu backhoe loaders, which comes to market with a number of innovations. It has been developed with constant attention to the needs of customers from all over the world. The result is a user-friendly machine that offers top class performance.

**Unique comfort**
- Ergonomic interior design
- Reduced noise inside cab
- Air condition available as option
- Suspended seats include full adjustable air version

**Exclusive design**
- Optimal parallel lifting
- Excellent loading performances
- S-shape backhoe
- Functional layout with hydraulic piping and hoses along the boom
- Highest breakout force and lifting capacities

**Premium performance**
- PPC servo-controls standard for the front loader and the backhoe
- “Full Power Shift” transmission
- CLSS (Closed Load Sensing System)
- Variable flow piston pump
- “Power” and “Economy” working modes
Excellent visibility
• Wide round glass surfaces
• Sloped and narrow engine bonnet
• Upper front window for full visibility of the front bucket
• Total control of the surrounding area

Total versatility
• 3 steering modes: 2WS, 4WS, crab
• Hydraulic side shift available
• Flip over forks and pallet forks available
• Quick couplers for the front and rear buckets

WB97S-5
ENGINE POWER
74 kW / 99,2 HP @ 2,200 rpm
OPERATING WEIGHT
8.700 kg

Komatsu Satellite Monitoring System
Premium Performance

Hydraulic system
The WB97S-5 offers high productivity and top performance, with increased breakout force and lifting capacities. The core of the Komatsu backhoe loader hydraulics is certainly the consolidated CLSS (Closed Load Sensing System). Thanks to its variable flow, the system efficiently supplies the power the machine requires, when it is needed. With two working modes, “Power” and “Economy”, the operator can choose between maximum power and minimum fuel consumption.

Absolute control
PPC servo-controls are standard for the front loader and backhoe. The ‘Full Power Shift’ transmission is controlled by a twist grip lever, with automatic gear shifting as standard. A ‘kick-down’ function is also fitted as standard, allowing sequential shifting from 2nd gear to 1st by just pressing a switch.
Loader
The front loader design ensures optimal parallel lifting; in addition, the divergent shape of the arm greatly improves visibility and provides excellent loading performance. The design of the backhoe is completely new: it features a clean and functional layout, with hydraulic piping and hoses along the boom.

S-shape backhoe
The rounded shape of the backhoe enhances the loading ability of the machine and its capacity to overcome obstacles, while ensuring a high breakout force. The telescopic arm significantly increases the machine’s versatility.
Unique Comfort

Operator’s environment
The cab has a modern design, a ROPS and FOPS structure and is fully equipped. Its increased internal volume and wide round glass surface offer great comfort to the operator. The backhoe joysticks are mounted on two independently adjustable columns and ensure excellent control. The multifunction joystick for the loader includes the controls for the 4×1 bucket, declutch and speed-up function. Complete instrumentation, easily reachable control panel and plenty of holders and storage compartments make this machine the best in its class.

New seat range
The air suspended Deluxe seat or the more traditional mechanical suspended seat both guarantee the best interface between the machine and the operator. The air suspended seat also offers adjustable armrests, headrests and lumbar regulation as standard.
Custom made

It’s possible to select 3 steering modes: 2 wheel steering (standard operation), 4WS (agile and fast operation) and crab (confined areas). The many options offer a high level of customisation: hydraulic side-shift for the backhoe, LSS (Load Stabilizer System), radial tyres, offset boom and quick couplers are just a few.
Excellent Visibility

Perfect all round view
The wide round glass surface presents a highly increased visibility. The bonnet shape and the upper front window make it easy and safe to work with the front loader. When operating the backhoe excavator, the operator can easily open the single frame window and comfortably overlook the surrounding area.
Komtrax is a revolutionary machine tracking system designed to save you time and money. You can now monitor your equipment anytime and anywhere. Use valuable machine data received via the Komtrax web site to optimise your maintenance planning and machine performances.

With Komtrax, you can:

- Check when & where your machines are at work
- Be informed of unauthorized machine use or movement
- Set and receive e-mail notification for security alarms

For further details on Komtrax, please ask your Komatsu dealer for the latest Komtrax brochure.
Specifications

ENGINE

The engine has been developed in compliance with the strictest European standards (97/68EC 2004/26/EC – EU Stage IIIA) on the reduction of exhaust emissions.

Model ........................................... Komatsu SAA4D104E-1
Type ........................................... vertical, 4-cycle water-cooled diesel engine
Displacement ........................................... 4,485 cm³
Bore × stroke ........................................... 104 × 132 mm
No. of cylinders ........................................... 4
Compression ratio ........................................... 17,5:1
Combustion ........................................... direct injection (DI)
Aspiration ........................................... turbo-intercooled
Engine power at rated engine speed ........................................... 2,200 rpm
ISO 14396 ........................................... 74 kW / 99,2 HP
Max. torque/engine speed ........................................... 420 Nm/1,200 rpm
Cooling system ........................................... radiator
Air filter type ........................................... dry filter with safety element
Starting system ........................................... electric motor with pre-heating air system for cold climate

OPERATING WEIGHT

Standard machine operating weight ........................................... 8,700 kg
Total machine weight ........................................... 9,500 kg
Operating weight increase
standard bucket ........................................... -300 kg
offset boom ........................................... +190 kg
standard arm ........................................... -230 kg
pallet forks ........................................... -280 kg
forks for 4×1 bucket ........................................... +150 kg

HYDRAULIC SYSTEM

SyncroSystem hydraulics allows the operator very precise and simultaneous movements. This system incorporates two different working modes: Power and Economy. The advanced hydraulic system includes also the function “Speed Up” to increase the working speed of the front loader.

System ........................................... SyncroSystem
Type ........................................... Closed Load Sensing System, CLSS
Pumps type ........................................... variable displacement axial pistons
Pumps control system ........................................... Load Sensing
Main valve ......LIFD “Load Independent Flow Divider” modular type
Max delivery ........................................... 165 ltr/min
Working pressure ........................................... 250 bar

ELECTRIC SYSTEM

The electric system is easily accessible and protected: connections are sealed and waterproof, and comply with the strictest international safety rules.

Voltage ........................................... 12 V
Battery ........................................... 155 Ah
Alternator ........................................... 120 A
Starter ........................................... 3 kW

ENVIRONMENT

Vibration levels (EN 12096:1997)*
Hand/arm ........................................... s ≤ 2,5 m/s² (uncertainty K = 1,2 m/s²)
Body ........................................... s ≤ 0,5 m/s² (uncertainty K = 0,2 m/s²)

* for the purpose of risk assessment under directive 2002/44/EC, please refer to ISO/TR 25398:2006.

STEERING SYSTEM

The front steering wheels are controlled by a hydrostatic “Load Sensing” with steering priority valve system. Turning radius (without using brakes), with 4 wheel steering:

Loader outer angle ........................................... 4,770 mm
Outer wheel ........................................... 4,175 mm

The values are valid with 24” tyres.

TRANSMISSION

Electronically-controlled, four-wheel drive, “Full Power Shift” transmission. The control is automatic, with a knob used to select the direction of travel and the gears, at full power, without losing traction.

Travelling speeds with 28” tyres:

<table>
<thead>
<tr>
<th>GEAR</th>
<th>FORWARD</th>
<th>REVERSE</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st</td>
<td>6,5 km/h</td>
<td>6,5 km/h</td>
</tr>
<tr>
<td>2nd</td>
<td>11 km/h</td>
<td>11 km/h</td>
</tr>
<tr>
<td>3rd</td>
<td>23 km/h</td>
<td>23 km/h</td>
</tr>
<tr>
<td>4th</td>
<td>40 km/h</td>
<td>40 km/h</td>
</tr>
</tbody>
</table>

AXLES

“Heavy duty” axles with planetary reduction gears in the wheel hubs. Front axle total oscillation angle 16°. Limited slip differential on both axles.

Max. front strength (Dynamic) ........................................... 8,000 daN
Max. rear strength (Dynamic) ........................................... 8,000 daN

BRAKES

Oil immersed disc brakes are actuated by individual braking on each rear wheel with 2 separate pedals. Total integral braking on the 4 wheels is activated by operating the two pedals at the same time.

Disc diameter ........................................... 270 mm
The caliper parking or safety brake is operated through a hand lever.

TYRES

Standard ........................................... 16.9 × 28 - 12 PR
Option ........................................... 16.9 × 24 - 12 PR

440/80 R28

CABIN

ROPS (ISO 3471, SAEJ1040) and FOPS (ISO 3449, SAEJ 231) cab designed in order to offer the best visibility, ergonomics, low noise and comfort. Two doors, full opening rear window with front and rear windscreen wipers. Internal lay out includes full adjustable seat, fresh filtered air intake ventilation and easy to read front and side dash board.

FRAME

The frame is a reinforced and closed box structure, which increases stiffness and reliability.
**LOADER**

The design of the front loader allows excellent parallelism when lifting and lowering the bucket. Furthermore, thanks to the linkage geometry, the greasing points have been reduced.

- Standard bucket width: 2,420 mm
- Standard bucket capacity (ISO 7546): 1.1 m³
- STD bucket weight: 450 kg

**REFILLS**

<table>
<thead>
<tr>
<th>Type</th>
<th>Capacity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Engine oil</td>
<td>12.8 ltr</td>
</tr>
<tr>
<td>Cooling system</td>
<td>16.5 ltr</td>

<tr>
<td>Gearbox oil</td>
<td>16 ltr</td>
</tr>
</tbody>
</table>

**BACKHOE**

The boom has a reinforced structure and allows 180° rotation, still preserving high torque. The casted swing support and arm ends ensure high fatigue resistance. Vertical outriggers with adjustable wear device.

- Bucket breakout force (ISO 6015): 5,980 daN (6.100 kg)
- Arm breakout force (ISO 6015): 3,920 daN (4.000 kg)

</table>

When used in object handling operations, the backhoe portion must be equipped with hose burst valves (boom, arm and overload warning device) in compliance with EN474-4 and must operate in accordance with the related local regulations.
4 Wheel Steering Backhoe Loader

WB97S-5

Standard Equipment

- Komatsu EU Stage IIIA compliant turbo engine
- Komtrax - Komatsu satellite monitoring system
- Load sensing, variable displacement axial piston pump
- Side-by-side radiator
- 4 wheel drive
- Deluxe mechanical suspension seat
- Limited slip differential on both axles
- 4 wheel steering (3 modes) with electronic alignment
- Front mudguards
- Decoult switch
- Foot pedal and hand control accelerator
- Horn
- Maintenance free battery 155 Ah
- 12 V external electric plug
- 12 V internal electric plug
- Anti-freeze (-36 °C)
- Front and rear working lights
- Road homologation
- Lights for road travel
- Rotating beacon
- External rear-view mirrors
- Internal rear-view mirror
- ROPS/FOPS cab with heater and fan
- Tinted glass
- Adjustable steering column
- Adjustable seat with safety belt
- Front and rear washer and windshield wipers
- Internal storage compartments (two lockable)
- Cup holder
- Sun visor
- Radio pre-setting
- Fully opening bonnet
- External lockable toolbox
- Dry type air cleaner with clogging indicator
- Fuel filter with integrated water separator
- Gauges & indicators: transmission oil temperature, 4WD engagement, brake oil level, fuel level, hour meter, pre-heating, engine speed, engine coolant temperature, engine oil pressure, air filter clogging, steering mode, wheels alignment
- Safe position seat sensor
- PPC servo-controls for stabilisers
- PPC lock switch
- Tyres 16.9 × 24 - 12 PR
- Backhoe boom and arm safety valves, overload warning device (for EU countries only)

Optional Equipment

- Air conditioning
- Additional front counterweights (170 kg, 375 kg)
- Deluxe pneumatic suspension seat
- Drive shaft guard (front)
- Cold area arrangement (-30 °C) with 185 Ah battery and pre-heating systems
- High ambient/altitude arrangement
- TÜV + TBG version (20 km/h or 40 km/h)
- Battery disconnection safety switch
- Rubber pads for stabilisers
- Hose burst valves:
  - loader arm
  - backhoe boom and arm safety valves, overload warning device (for non-EU countries only)
- Biodegradable hydraulic oil
- Hydraulic hand hammer circuit
- Hydraulic oil filter clogging indicator
- Air cyclone pre-filter
- Refuelling pump
- Four additional working lights on cab
- Radio
- Backup alarm
- Tyres:
  - 16.9 × 28 - 12 PR
  - 440/80 R28
- LOADER
  - LSS (Load Stabiliser System)
  - Safety valve deactivation switch
  - Auxiliary hydraulic circuits:
    - floating function
    - “Return-To-Dig” function
    - additional front auxiliary hydraulic circuit (6-way valve)
- Attachments:
  - bolt-on cutting edge
  - cutting edge on teeth
  - 4×1 bucket with pre-setting for flip-over forks and angle opening indicator
  - flip-over forks on 4×1 bucket
  - hydraulic and mechanical quick-coupler
  - forks (for quick-coupler)
  - general purpose bucket (for quick-coupler)
  - 4×1 bucket (for quick-coupler)
  - dozer blade
  - snow blade
  - hand hammer
  - heavy duty 4×1 bucket

BACKHOE

- PPC servo-controls
- Power/Economy working modes
- Electro-hydraulic backhoe boom lock
- Backhoe swing transport lock
- Electro-hydraulic backhoe slide frame release lock
- Hydraulic cushions
